Rectifier BYX10G

FEATURES

• Glass passivated
• High maximum operating temperature
• Low leakage current
• Excellent stability
• Available in ammo-pack.

DESCRIPTION

Rugged glass package, using a high temperature alloyed construction. This package is hermetically sealed and fatigue free as coefficients of expansion of all used parts are matched.

LIMITING VALUES

In accordance with the Absolute Maximum Rating System (IEC 134).

**GRAPHICAL DATA**

**Fig.2** Maximum permissible average forward current as a function of tie-point temperature (including losses due to reverse leakage).

\[ a = 1.57; V_R = V_{RWM_{\text{max}}}; \delta = 0.5. \]

Lead length 10 mm.

**Fig.3** Maximum permissible average forward current as a function of ambient temperature (including losses due to reverse leakage).

\[ a = 1.57; V_R = V_{RWM_{\text{max}}}; \delta = 0.5. \]

Device mounted as shown in Fig.9.

**Fig.4** Maximum steady state power dissipation (forward plus leakage current losses, excluding switching losses) as a function of average forward current.

\[ a = I_{F\text{RMS}}/I_{F\text{AV}}; V_R = V_{RWM_{\text{max}}}; \delta = 0.5. \]

**Fig.5** Maximum permissible junction temperature as a function of reverse voltage.

Solid line = \( V_R \).
Dotted line = \( V_{RWM} \); \( \delta = 0.5 \).

PACKAGING OUTLINE

DEFINITIONS

Data sheet status
- Objective specification: This data sheet contains target or goal specifications for product development.
- Preliminary specification: This data sheet contains preliminary data; supplementary data may be published later.
- Product specification: This data sheet contains final product specifications.

Limiting values
Limiting values given are in accordance with the Absolute Maximum Rating System (IEC 134). Stress above one or more of the limiting values may cause permanent damage to the device. These are stress ratings only and operation of the device at these or at any other conditions above those given in the Characteristics sections of the specification is not implied. Exposure to limiting values for extended periods may affect device reliability.

Application information
Where application information is given, it is advisory and does not form part of the specification.

LIFE SUPPORT APPLICATIONS
These products are not designed for use in life support appliances, devices, or systems where malfunction of these products can reasonably be expected to result in personal injury. Philips customers using or selling these products for use in such applications do so at their own risk and agree to fully indemnify Philips for any damages resulting from such improper use or sale.
